Page 9-10

PolySafe Protocol is a project in the DeFi world developed in SmartContracts under the Polygon BlockChain network.

It is intended for investors looking for a way to profit with the least possible risk. Therefore, The PolySafe Protocol can be one of the best investment options, since each investor has control of their investment at all times backed by the PolySafe Token (\$PS).

OUR STRATEGIES

Extend the PolySafe Protocol to other ecosystems.

Developing various innovative platforms and projects to be able to apply a real utility to the Token \$ PS.

Manage Marketing strategies that can cover social networks and advertisements on the websites of Dapps Radars, Google, among other means.

After strengthening the community, we will seek alliances with other strong projects and thus strengthen ourselves even more.

All services launched under the PolySafe Protocol will be accessible through web applications. With the easy understanding and easy use of them, to guarantee the expansion of our community.

FEATURES

The PolySafe Protocol is based on the Token \$ PS. This can only be purchased through one or more deposits in MATIC (in the future, other currencies will be added) through the "PolyStake" website. They can be exchanged for MATIC at any time.

\$PS it has a total supply of 1,000,000 and the exchange value varies according to the amount of MATIC deposited and the amount of \$PS in circulation. The usefulness of the \$ PS token will cause its value to increase over time.

OPTIMIZED STRATEGIES

Our smart contracts will adjust investment strategies to optimize returns for you.

Our team and the PolySafe community will constantly re-evaluate, update and implement yield growing strategies to obtain the best risk adjusted yield.

TOKEN BURN?

We have NOT created a token burning program in PolySafe Protocol. Instead, the total of \$ PS tokens will be limited, which means that the more \$ PS in circulation as \$ PS is used, the more its value will increase due to the availability deficit.

PRELIMINARY FEE STRUCTURE FOR POLYSAFE PROTOCOL:

- A Marketing management commission of 4% on the amount of deposits in MATIC.
- 4% of revenue per Stake for the administration of social networks.
- An AirDrop of 100 \$PS is released automatically every 7 days for those who meet the challenges on the web.
- A total of 100,000 \$PS will be managed for Airdrops, Contests and challenges that will be published gradually.
- 4% of the income will be destined to the Dev for the development of future projects and platforms that will occupy the profit of the Token \$ PS.

SUPPORTED POOL

In the beginning they can only acquire \$PS by depositing MATIC as a mining.

The \$PS generated can be put into Stake to multiply the rewards by \$PS. After a minimum period, they can release the Stake of the \$PS wagered.

Mining through MATIC does not allow the funds to be released, they provide the liquidity of \$PS.

ROAD MAP

This roadmap summarizes the path that the PolySafe Protocol is heading for. More than a summary, it is simply an advance.

The development of authentic projects and new strategies will not stop this year.

INSTRUCTIONS

We have put together a tutorial for beginners who want to participate in the Protocol PolySafe and start the journey as a Performance Investor. To begin, you will need to connect your wallet ([Metamask](#), [WalletConnect](#), [imtoken](#), Mathwallet, [BitKeep](#), [HyperPay](#) etc.)

HOW TO DEPOSIT AND STAKE ON POLYSAFE PROTOCOL:

1. In the "MINT POLYSAFE" box, deposit MATIC to generate PolySafe Tokens.
2. In the box below "STAKE POLYSAFE", deposit the \$ PS earned in the box above to generate double \$ PS rewards.

HOW TO GET ADDITIONAL REWARDS:

1. In the box "CLAIM AIRDROP" you can complete the challenges and earn more \$PS from the automated AirDrop.
2. The box entitled "SELL POLYSAFE" is dedicated to the management of exchange or sale of \$PS by MATIC. (To protect the value of the PolySafe Token, only a total of 40,000 \$PS per day can be sold).

3. From the last box you can share your referral link and get referral rewards.

MINIGAMES

PolySafe has 3 mini-games initially.

Each game shows the instructions from the web, they are very simple to play and can give us additional benefits.

RECOMENDATIONS

1. Stay informed through the official PolySafe Protocol social media.
2. Interact on social networks and any questions that may arise, use the means of contact exposed on the official website.
3. All investment is risky, although the PolySafe algorithm is designed to reduce risks ... Do not

invest more than you are willing to lose!

4. Don't neglect your investments.

DISCLAIMER

Please note that this product should be used at your own risk. Utmost good faith has been used in constructing this product and the team will continue to update the code, implement safety measures, and partner with the best security teams in the industry to ensure fund safety.

TEAM & GOALS

HOW IS POLYSAFE ORGANIZED?

PolySafe is a decentralized working hub for people with a vision to come together and build the future of global finance. Smart contract devs, strategists, statisticians, designers, and artists - anyone can join and contribute (no matter your nationality, sex, or views). By investing in PolySafe Protocol, you are investing in the idea that a group of highly technical individuals can safely, securely and creatively leapfrog the dinosaurs of traditional finance.

WHY IS THE PROJECT ANONYMOUS?

Personalities get in the way of projects, and we believe PolySafe speaks for itself. By having a team that operates anonymously, even amongst itself, we can focus on providing the best experience for our users. That's because we believe the strength of PolySafe comes from what we build, which is an opportunity for investors to both automate AND maximize the ROI of their holdings. We urge anyone with concerns that anonymity diminishes credibility to join our Telegram community (<https://t.me/PSPProtocol>) and get a first-hand feeling for the strength and depth of the project.

HOW CAN I GET IN TOUCH WITH POLYSAFE?

Our global community managers and team members can be contacted anytime through our official [Telegram](#) and other channels. We should mention that generally speaking within investment communities there are some bad actors around looking to scam, phish, or maliciously target users. Please double check the validity of whoever you talk to, and remember that no one representing PolySafe will ever ask you to provide wallet keys or recovery codes.

WHAT'S YOUR RELATIONSHIP WITH POLYGON NETWORK?

The platform began life on the Polygon network as one of the very first Yield Optimizers, but is evolving into a multi-chain ecosystem. Polygon was our only home for many days, and helped us kickstart our growth. While it's our highest chain, the gap keeps shrinking as our decentralized army of contributors looks for the best available yield in the multi-chain ecosystem.
